

# IX RIDITA 2024 CONFERENCE LISBON, PORTUGAL

27 > 28 > 29 JUNE

## IX INTERNATIONAL CONGRESS OF THE IBERO-AMERICAN AIR TRANSPORTATION RESEARCH SOCIETY

# CALL FOR PAPERS

IASA Association and ISEC Lisboa are pleased to announce that the IX Congress of the IBERO-AMERICAN AIR TRANSPORT RESEARCH NETWORK (RIDITA), will be held at ISEC Lisboa - Higher Institute of Education and Sciences, Lisbon, Portugal, on June 27-29, 2024.

RIDITA is an open, inclusive and non-profit group of permanent discussion, made up of researchers, trainers, and professionals related to Air Transportation that perform in Iberoamerican academic institutions, founded in 2007.

The purpose of this Congress is to bring together researchers from a variety of air transportation areas, working on the problems of analyzing and understanding the patterns of success, through different angles.

The aim is to discuss The Resilience and Sustainability of Air Transportation under Sustainability challenges scope. The best papers of the Congress will be invited to contribute to special issues edited by refereed journals.

- 14h00 -18h00  
Technical visit to NAV-Portugal  
Lisbon Airport

## VENUE

Sustainable development is development that meets the needs of the present without compromising the ability of future generations to meet their own needs (Brundtland Report, 1987). Historically, sustainability has been linked to the fight for social justice, conservationism, internationalism, and other past movements at the end of the XX century. These ideas culminated in the so-called "Sustainable Development".

ISEC Lisboa is committed to aligning its activities and responsibilities with the United Nations 2030 Agenda for Sustainable Development, contributing to the Sustainable Development Goals (SDGs), and joining locally in a common and global effort. To this end, it decided to define and implement a Sustainability Policy embodied in the Sustainability Action Plan and the Strategic Plan for Adaptation to Climate Change.

The line of research in Aeronautics, Space and Air Transport (AETA), made up of research professors from ISEC Lisboa and their students in these areas, arises because they believe that everyone can be involved in the research fields of aviation, air transport, aeronautics and space given the capacity of the teaching staff installed.
